

Abstract:

A healing composition containing at least one non-fibrotic growth factor in combination with a pharmaceutically acceptable carrier is disclosed. A method of preparation of the composition and method of treating a host, suffering from a wound or fibrotic condition, disease, disorder with the composition is also disclosed.

In the Claims:

Please amend the claims as follows.

*✓* 1. (Twice amended) [Compositions] A composition for use in the healing of wounds with no or at least reduced scarring as compared with healing by natural processes and for the treatment of fibrotic disorders, comprising at least one non-fibrotic growth factor with no fibrotic growth factor or with fibrotic growth factors or fragments thereof present in the composition in a lower proportion to such non-fibrotic growth factor than occurs naturally in the wounds or disorders in question, or with such fibrotic growth factors together with anti-fibrotic agents against them, all in a pharmaceutically acceptable carrier.
